# Project Overview

The development of "Music for Everyone" focused on creating a user-friendly interface and achieving high accuracy in chord recognition that will help people acquire a new skill in no time.

## Project Goals

- ◆ Help the artists write their musical scores!
- ◆ Helps you learn a new skill faster than ever!!

# Target Audience

Everybody with a  
passion for music

Independent Artists

# Market

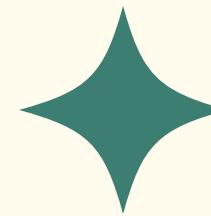

**Music for everybody** is one of the first AI tutoring applications that incorporates image recognition models.

# Opportunities

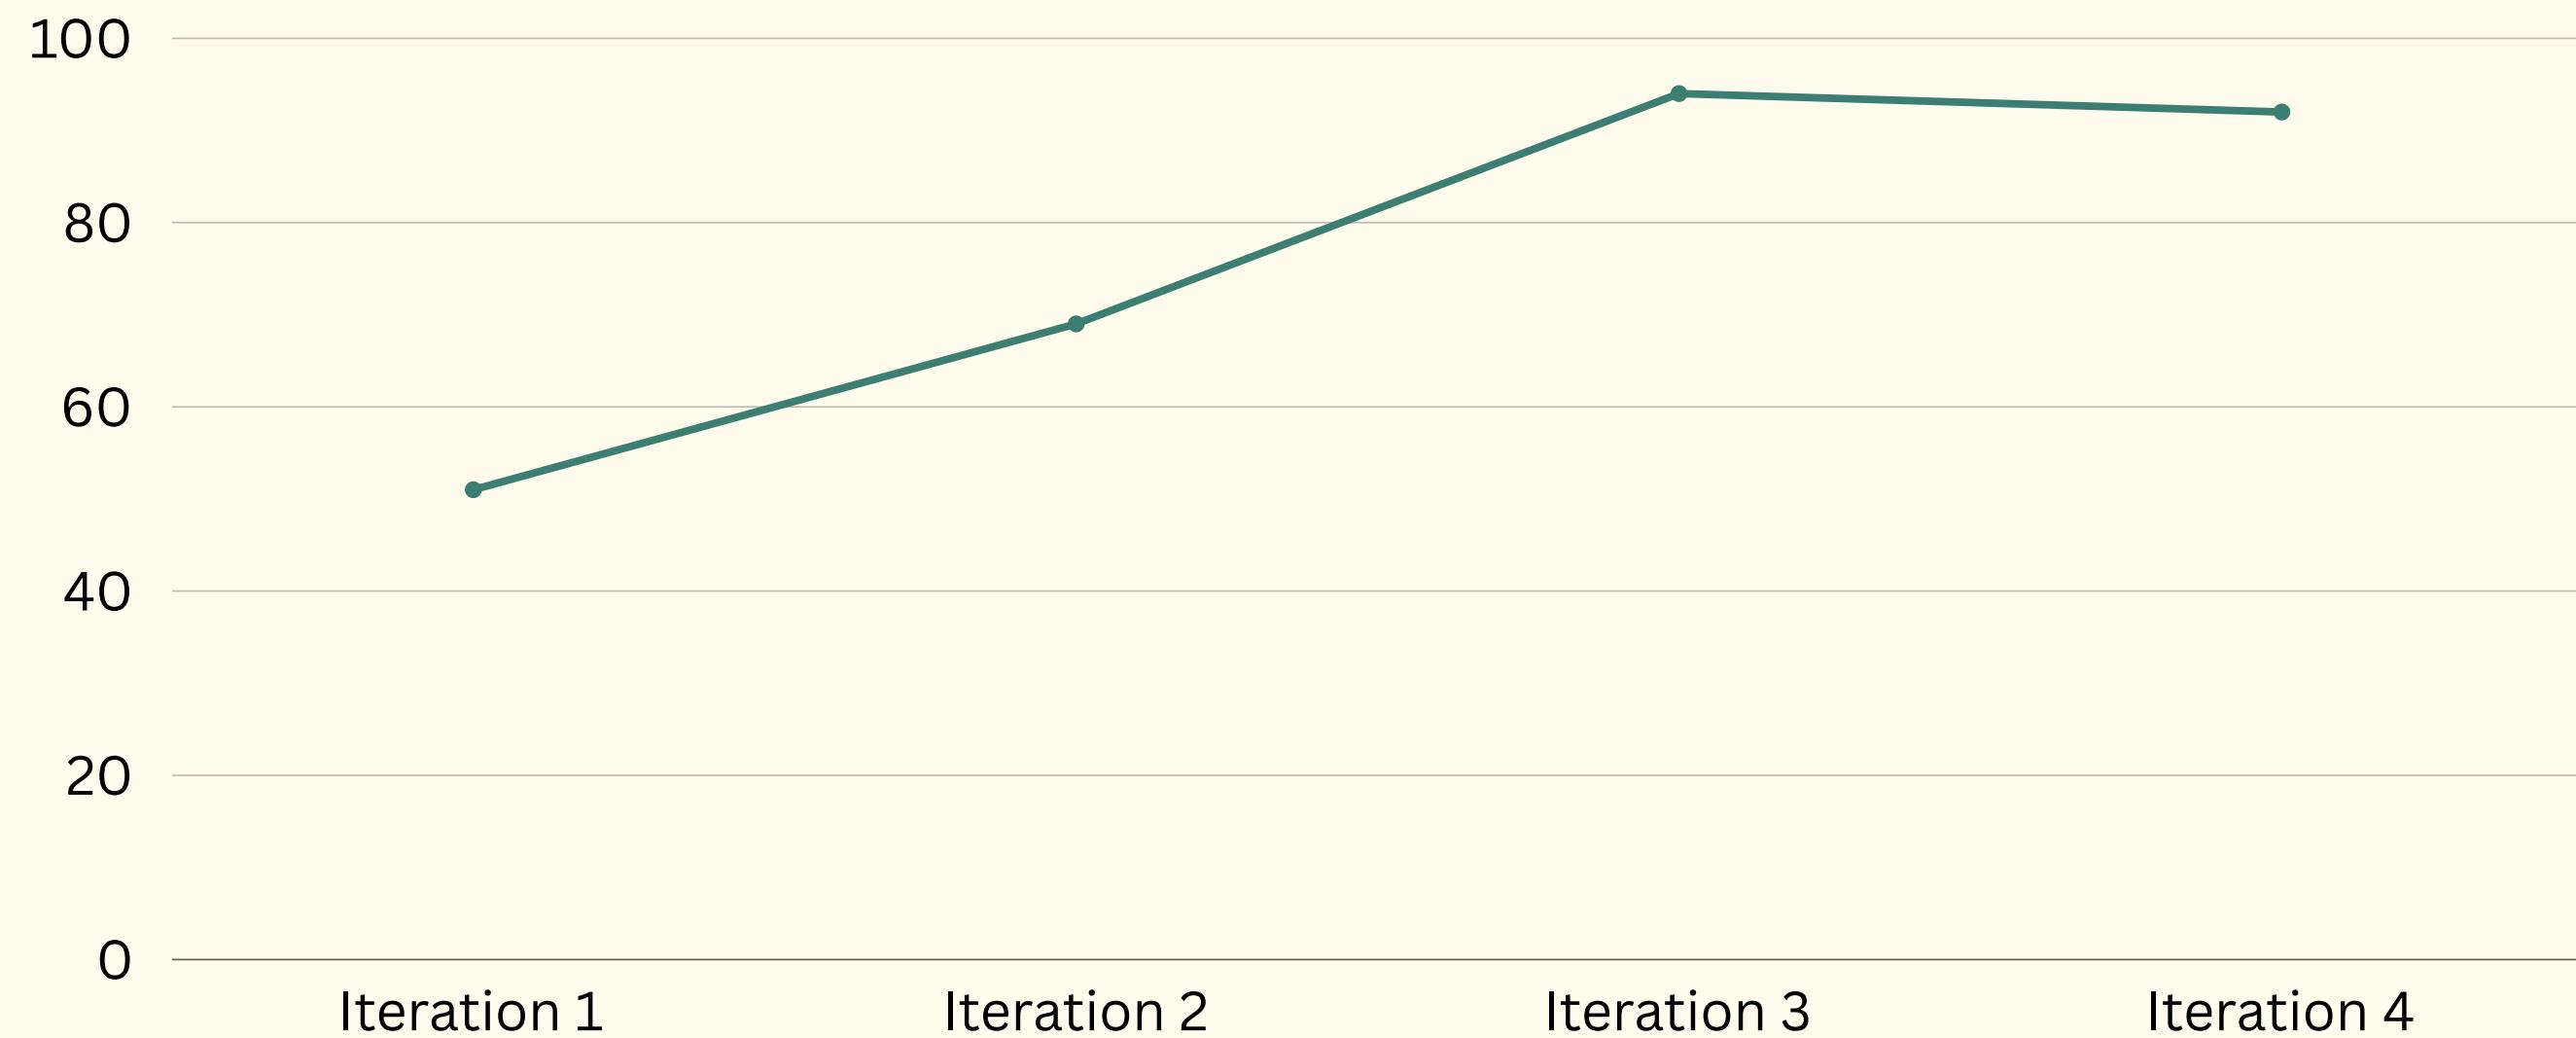

The market for such an application is not exploited with no giant in this industry and a lot of prototypes.

# AI Accuracy

92.31%

The AI was carefully trained on almost 500 custom made photos, reaching an impressive accuracy of 92%.
